DESCRIPTION:

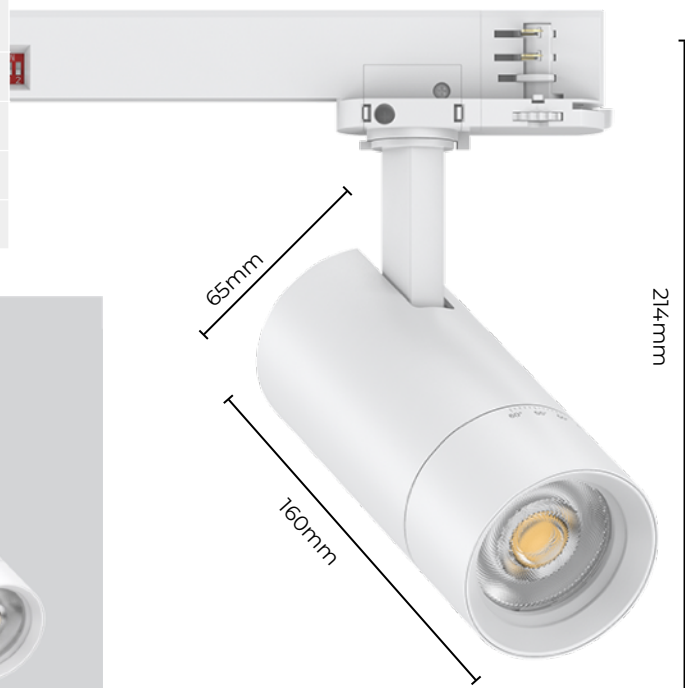

Very versatile **22W Professional LED Track Light**. Designed for high-performance illumination in domestic, retail, commercial, and modern interior spaces, with selectable colour temperature of 3000k, 4000k, or 5700k - in Matte White or Matte Black anodised finish.

The light is 90° adjustable in a vertical direction and 355° horizontally, with a special **adjustable lens 24-60°**, for maximum adaptability.

It has high brightness and very good colour rendering with CRI 90. In black or white anodised finish.

Full aluminium housing gives great aesthetics, efficient cooling and long life.

Full range of tracks and adjustable, special angle connectors available.
