

KINETIC WIRELESS SWITCHES & RECEIVERS

DESCRIPTION:

NEW TECHNOLOGY Greenhouse Kinetic RF Switches in 1/2/3 Gang with white finish - no batteries or wiring needed.

These innovative switches allows you to control the lights in your home with the push of a button - powered by touch. They use kinetic energy (of or produced by movement) and the kinetic motion of the switch action is enough to generate the electrical pulse needed to send the signal to the receiver. Being wireless, you can place the controls exactly where you want them. Completely portable and easy to set up, this groundbreaking new technology will optimise your lighting options.

Can be used as a remote (portable) or can be wall-mounted. With up to three configurable buttons, you can utilise one switch to control multiple rooms or lights. Control distance: up to 25m indoor using RF 433MHz multiple way control.

Can be mounted on various clean surfaces - glass, marble, ceramic etc.

Various controllers available - Dimmable, Non-Dimmable, WiFi, Dimmable WiFi.

Google and Alexa compatible with Smart WiFi controller.

KEY INFORMATION

POWER	Self Powered
TYPE	Push Button
REPLACES	Traditional wall switch plate
RADIO FREQUENCY	RF 433MHZ
MATERIAL CONSTRUCTION	White UV Stabilised Polycarbonate
IP RATING	IP67 Indoor and Outdoor use
OPTIONS	Smart & Dimmable options with appropriate controller
TRIM COLOUR	White
DIMENSIONS	86mmx86x16.6mm
OPERATING RANGE	Up to 80m Outdoors, 25m Indoors
WARRANTY	3 Years
CERTIFICATION	SAA, RCM, CE
