With the widest range, Greenhouse can provide the best Downlights to suit your requirements.

For commercial and retail applications, we can enhance your products with a range of LED Display lights and Downlights. Perfect colour temperatures to match or enhance your existing lighting, high colour rendering, extra brightness and savings of over 80% of your running costs.

Perfect Colour

Our lighting has been colour matched to complement existing lighting and to suit specific needs. We also offer a wide range of downlights that are switch-selectable to one of three different colour temperatures.

Wifi, Bluetooth & 3 Switch Control

Now with amazing new colour changing, WiFi or Bluetooth downlights adjustable by remote or Smart devices, you can set and control the exact colour temperature from warm to cool as well as dim and brighten your lights to your specific needs. Memory function will retain your settings and there is no need to add extra switches or dimmers.

Size Range

From 30mm, 3W starlights to 255mm, 60W Downlights our range will cover most requirements.

Certification

Products are all Australian certified and most have IC-4 certification, allowing for safe and quick installations. All our products are covered by public liability and backed by long warranties and quick product replacements
