### DESCRIPTION:

NEW Greenhouse SMART Kinetic RF Switches in 1/2/3 Gang with white finish.

This innovative Smart switch allows you to control the lights in your home with the push of a button. The kinetic switches are wireless so you can place the controls exactly where you want them. Completely portable and easy to set up, this nifty home accessory will optimise your smart lighting system.

It uses kinetic energy and is powered by your touch so **no batteries or wiring needed**. Fully portable for use as a remote, or can be mounted to the wall for easy storage. With up to three configurable buttons, you can utilise one switch to control multiple rooms or lights. Control distance: up to 30m indoor using RF 433MHz multiple way control.

Can be mounted on various clean surfaces - glass, marble, ceramic etc.

Various controllers available - Dimmable, Non-Dimmable, WiFi.

Google and Alexa compatible with Smart WiFi controller.
