

24V

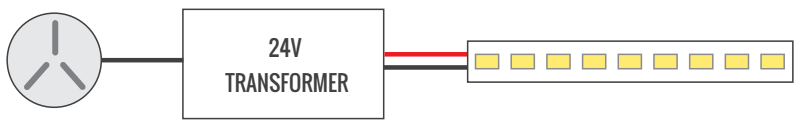

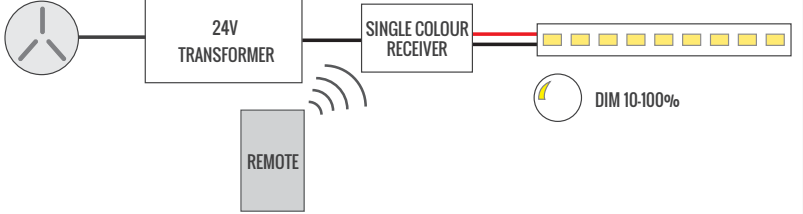

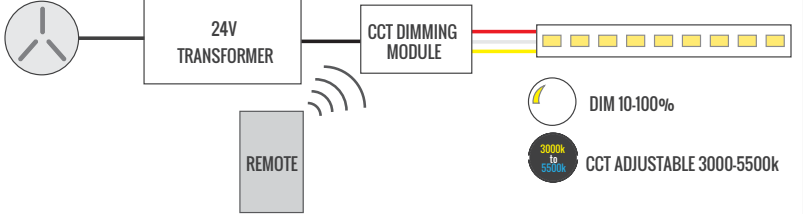

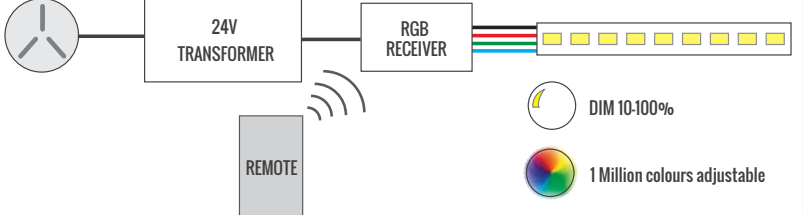

24V STRIP LIGHTING ORDER FORM

www.greenhse.com / sales@greenhse.com.au

BRIGHTEST DOTLESS/SEAMLESS LIGHT

24V FOR LOWER HEAT AND LONGER LENGTHS (1-10 metres)

- 3000 Lumens/m - Highest Brightness
- COB Seamless and/or 225 LEDs/m - creates dotless effect
- CRI 80-90 - Highest colour output
- IP65 Silicon gel, IP66 silicon sleeve and IP66 Nano coating options
- Gateways can be linked to Router to enable strip light controllers/modules to work with SMART devices, Amazon Alexa or Google

<p>1. All SINGLE colour strip lights require compatible size 24V transformer.</p>	 <p>The diagram shows a three-pronged AC power source connected to a box labeled '24V TRANSFORMER'. Two wires (red and black) connect the transformer to a long strip light containing several yellow LED chips.</p>
<p>2. OPTIONAL Dimmer Modules and remote can be added. An additional remote is required.</p>	 <p>The diagram shows a three-pronged AC power source connected to a '24V TRANSFORMER'. Two wires connect the transformer to a box labeled 'SINGLE COLOUR RECEIVER'. A 'REMOTE' is shown with a signal icon pointing to the receiver. The receiver is connected to a strip light. A dimmer icon is shown with the text 'DIM 10-100%'.</p>
<p>3. All CCT colour changeable and dimming strip lights require transformer and colour receiver with remote.</p>	 <p>The diagram shows a three-pronged AC power source connected to a '24V TRANSFORMER'. Two wires connect the transformer to a box labeled 'CCT DIMMING MODULE'. A 'REMOTE' is shown with a signal icon pointing to the module. The module is connected to a strip light. A dimmer icon is shown with the text 'DIM 10-100%'. A circular icon shows a color spectrum from 3000k to 5500k with the text 'CCT ADJUSTABLE 3000-5500k'.</p>
<p>4. All RGB Strip lights require transformer and colour receiver with remote.</p>	 <p>The diagram shows a three-pronged AC power source connected to a '24V TRANSFORMER'. Two wires connect the transformer to a box labeled 'RGB RECEIVER'. A 'REMOTE' is shown with a signal icon pointing to the receiver. The receiver is connected to an RGB strip light. A dimmer icon is shown with the text 'DIM 10-100%'. A circular icon shows a full color spectrum with the text '1 Million colours adjustable'.</p>

24V STRIP LIGHTS ORDER FORM - Please tick

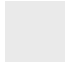

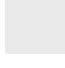

1. SELECT COLOUR & BRIGHTNESS

14W/M has 144 LEDs/m and is almost dotless with 1500 Lumens/m

20W/M has 224 LEDs/m and is dotless and has the highest output of 3050 Lumens/m

SINGLE COLOUR

Select the colour and brightness required to suit your application

	3500k	14W/m \$12/m	Warm, rich white suitable for hotels, bedrooms, restaurants for adding colour
		20W/m \$20/m	
	4500k	14W/m \$12/m	Clean natural white, still has some warmth, suitable for kitchens and bathrooms
		20W/m \$20/m	
	6000k	14W/m \$12/m	Bright white light, no yellow tints or warmth, suitable for displays or clean white look, signage, display fridges, kitchens, bathrooms
		20W/m \$20/m	

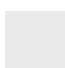

CCT ADJUSTABLE

CCT Adjustable. Any colour temperature and brightness level can be selected from warm 3000k-6000k to suit the requirement and mood. The NEW COB strip will have no dots and create a bright, rich even light

	3000k - 6000k Adjustable	20W/m \$20/m	Warm, rich white to cool white infinitely adjustable to suit requirement
--	--------------------------	-----------------	--

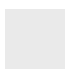

RGB

Specially select 3-in-1 RGB module insures wider colour range and brighter more vibrant colours. This strip also has a very good white balance ensuring millions of colours as well as white

	Full Colour RGB	14W/m \$17/m	Full colour, enabling 1 million colour options and simulated white, which can be adjusted
		24W/m \$24/m	

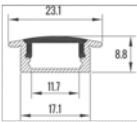

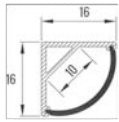

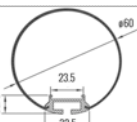

RGB - IP65

The NEW 240 LED/m strip ensures vibrant colours with dotless effect. Strip is also IP66 Nano coated suitable for kitchens, bathrooms and wet areas. The thin LEDs make it suitable for thin channels

	IP65-RGB	18W/m \$22/m	Vibrant, bright and dotless full colour strip - 1 million colour options and simulated white
--	----------	-----------------	--

2. SELECT LENGTH		3. SELECT TRANSFORMER SIZE = LENGTH OF STRIP X WATTS/m (+ 20% BUFFER)	
ALL LENGTHS HAVE SOLDERED CABLES BOTH SIDES & CAN BE CUT TO MAKE 2 X LENGTHS		Transformers need to be at least 20% larger than the maximum power requirement. For commercial applications it is recommended to use an IP65 option and allow for 20% buffer.	
1.25m (Cable - 1 end only)		24W INDOORS	For use with max 20W Strip (e.g. 1m 20W/m or 1.5m 14W/m)
2.5m		60W IP65	For use with max 50W Strip
5m		100W IP65	For use with max 80W Strip
7m		200W IP65	For use with max 160W Strip (e.g. 200W is suitable for 10m RGB 14W/m)
10m		250W IP65	For use with max 200W Strip (e.g. 250W is suitable for 10m RGB 20W/m)
		300W IP65	For use with max 250W Strip

4. SELECT CHANNEL TYPE Aluminium channels are used to support & protect strip lighting as well as provides a neat appearance

3m	\$30	THIN 19		For use under cupboards for a hidden effect or being around curves. Retro fit for hidden effect - use 2 sided tape
4m	\$40	RECESS (WING)		Wing channel is best for recessing into cupboards
4m	\$40	SURFACE RECTANGLE		Best for bathroom recesses or adding with tiling or even retro-fitting under cabinets
3m	\$35	CORNER 90°		Used for corner installations
4m	\$55	SURFACE WIDE		Suitable for special requirements
4m	\$80	RECTANGULAR SUSPENSION		Suspended light attached to ceiling for added light effect
2m or 4m	\$40 \$80	ROUND SUSPENSION		Suspended light attached to ceiling for added light effect

RECEIVERS & CONTROLLERS - PLEASE CIRCLE

SINGLE COLOUR RECEIVER

Single colour receiver works with controller or remote options and enables ON/OFF and dimming.
NO GATEWAY REQUIRED
