**Installation:** licensed electrician recommended – see the installation guide. Keep your invoice.

# Aluminium Channels for 24 V LED Strip – 3 m

## ABOUT THIS PRODUCT

Aluminium channels give 24 V LED strips a clean, professional finish and help draw heat away from the strip. The diffuser cover softens the light into a smooth line and hides the LED dots. Choose from mini, corner, thin, surface, wing and gyprock (plaster-in) styles, plus side-bend channels for Greenhse neon flex, in silver and selected white or black finishes. Each length is 3 m. Fix with screws or adhesive. Channels are pick up only and cannot be posted.

## MORE DETAILS

| | |
|---|---|
| **Electrical parts** | None, aluminium profile and diffuser only |
| **Fixing** | Screws or adhesive |
| **Certification** | Not required (no electrical parts) |

## SAFETY & COMPLIANCE

**No electrical parts**
This product has no wiring or electronics, so no electrical certificate applies.

| | |
|---|---|
| **Use with a Greenhse 24 V transformer (30 W or 60 W indoor models)** | SAA-230028-EA (valid to 17 Feb 2028) |

This product is a non-electrical accessory. Use it only with the certified Greenhse products it is made for.
