Talon Promax Exhaust Fan – Large

The ceiling power outlet and all wiring must be done by a licensed electrician (AS/NZS 3000) – turn the power off first.

IN THE BOX

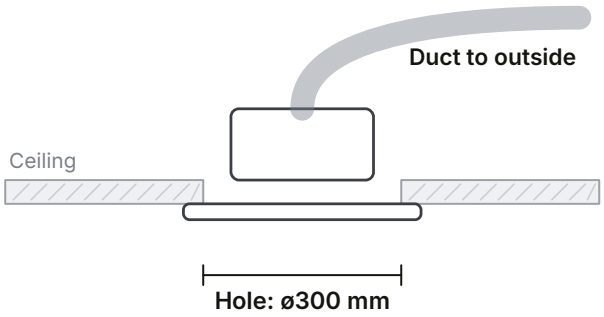

- 1 × Talon Promax exhaust fan (ø330 mm fascia)
- 1 × 100 mm duct adaptor with back-draft shutter
- 1 × 150 mm duct adaptor with back-draft shutter

YOU WILL NEED

- Plaster saw or 300 mm hole saw
- Screwdriver
- Safety glasses and dust mask
- Duct and outside vent (not included)

BEFORE YOU START

- Check there is at least 220 mm of space above the ceiling.
- Pick a spot between the joists, clear of cables and pipes. In a bathroom, your electrician checks the spot against the wet-area zone rules.
- Make sure fresh air can get in – a gap under the door or an open window.

STEP BY STEP

1. Turn the power off at the switchboard.
2. Mark a ø300 mm round hole and cut it with a plaster saw or hole saw.
3. Your electrician fits a switched power outlet in the ceiling within reach of the 0.9 m lead.
4. Take the fascia off the fan.
5. Fit the adaptor that matches your duct (100 mm or 150 mm). Its flap (back-draft shutter) stops outside air blowing back in. Tape the duct on and run it to an outside vent.
6. Plug the fan in. Push it into the hole and turn the screws until the swing clips grip the ceiling. Do not over-tighten.
7. Refit the fascia so it sits flat against the ceiling.
8. Turn the power on and test the fan from the wall switch.

DO NOT

- Don't kink the duct or use sharp bends – airflow drops.
- Don't vent into the roof space – duct it outside so steam is fully removed.
- Don't cut the hole until you have checked for joists and cables.

CARE & TROUBLESHOOTING

- Turn the power off, remove the fascia and wipe it with a damp cloth. Let it dry before refitting.
- If it won't run, check the ceiling outlet is switched on and the plug is fully in.

Installation: Greenhse recommends that every product is installed by a licensed electrician to AS/NZS 3000 and local rules. Any work on 240 V wiring must be done by a licensed electrician. Incorrect installation can be unsafe and may void the warranty.
Warranty: 3 years replacement. Keep your invoice and the electrician's certificate of compliance. Questions? Call (08) 9297 2969 or visit greenhse.com.
